

Homework: Manage and Display Student Data with Formatted Input and Output

Objective

Write a C program that:

1. Accepts the following information for a student:
 - **Student ID** (integer)
 - **Name** (string, up to 50 characters)
 - **Surname** (string, up to 50 characters)
 - **GPA** (floating-point number)
2. Display it afterwards

Example output:

Student Information:

```
-----  
Student ID  Name      Surname    GPA  
-----  
12345      Ad        Soyad      3.34
```
